OBJECTIVE

Entry-level Computer Science graduate with hands-on Python and machine learning project experience, strong analytical thinking, and a track record of collaborating effectively in team-based technical projects. Seeking to apply problem-solving and technical skills in a support or software engineering role.

EDUCATION

Pragati Engineering College, Surampalem / 2022 – 2026

Bachelor of Technology in Computer Science Engineering (AI & ML) | CGPA: 8.96/10

Relevant Coursework: Database Management Systems, Operating Systems, OOPs, SDLC

KEY SKILLS

Languages: Python, C

Web Technologies: HTML, CSS

Tools: VS Code, Google Colab, GitHub

Database: SQL

Soft Skills: Analytical Thinking, Problem Solving, Teamwork Ability

INTERNSHIPS

1M1B Green Internship | Intern / May 2025 – June 2025

- Built a data-driven model with a team to predict and reduce water usage for a conservation project.
- Built dashboards to track project results and report progress to mentors.

Google AI-ML Virtual Internship | AICTE-Eduskills / January 2025 – March 2025

- Analyzed datasets and built machine learning models across multiple guided projects, applying core AI/ML concepts to real-world scenarios.

PROJECTS

FitPulse – Health Anomaly Detection System (Infosys Springboard)

- Built a machine learning model in Python to analyze health data and detect anomalies using pattern-based techniques.
- Identified potential health risks by recognizing irregular patterns in health data.

Tools: Python, Machine Learning, Google Colab

Flame Sensor Alert System – Talent Expo Project

- Designed and built a fire detection system with a team, using Arduino and sensors to trigger a buzzer alert on flame or heat detection.
- Won 1st place among competing teams for this system at the college Talent Expo.

Expense Tracker Web Application

- Built a web application to record and categorize daily expenses, with a responsive layout for use across devices.

CERTIFICATIONS

- AWS Academy Graduate – Cloud Foundations & Machine Learning Foundations
- Google Cloud Computing Foundations – Google Cloud
- Salesforce Certified AI Associate

ACHIEVEMENTS

- Secured 1st place for developing a fire detection alert system using Arduino at the college Talent Expo.
- Organized and managed technical events, coordinating with participants and faculty for smooth execution.
- 5-Star rating in HackerRank Python.
